Dear Hiring Team,

My name is Emir Kayra Bacak and I am a third-year Computer Engineering student at Biruni University. I aspire to build a career in artificial intelligence and data science, and I am eager to further develop my skills by interning at Microsoft.

In my academic journey, I have focused on evolutionary algorithms and machine learning, acquiring foundational knowledge and applying it to practical projects. Looking ahead, I aim to specialize in deep learning and neural networks, areas that I find both fascinating and impactful.

An internship at Microsoft would provide me with the opportunity to contribute to innovative projects and solve real-world challenges while learning from experienced professionals. Additionally, I believe this experience will enhance both my technical skills and my ability to collaborate effectively within a team.

With my passion, eagerness to learn, and strong analytical skills, I am confident that I can add value to Microsoft. I would greatly appreciate the opportunity to discuss my qualifications and goals further in an interview.

Thank you for considering my application. I look forward to the possibility of contributing to your team.

Sincerely,
Emir Kayra Bacak
